Siegel and Rubinstein PiTech PhD Impact Fellow \| New York City Department of Health and Mental Hygiene, New York, NY

Center for Health Equity and Community Wellness (CHECW)

- Conducted ground-truth evaluation of AI chatbots for diabetes and COVID-19 public health information, comparing LLM-generated responses with physician-authored reference answers.
- Applied a 1–5 accuracy rubric to identify response-level errors and support systematic evaluation of chatbot performance.

Sep 2022 – Present

Graduate Research Assistant | Cornell University, New York, NY
Advisor: Shiri Azenkot

- Conducted mixed-methods HCI research on accessibility and collaboration in mixed-ability teams, including interviews and qualitative analysis of accessibility practices, teamwork, and allyship in virtual collaboration.
- Designed and evaluated AI-mediated support for inclusive collaboration, including scenario-based studies and interactive prototypes examining how AI shapes supportive communication, autonomy, and perceptions of care and responsibility.

Dec 2020 – May 2022

Undergraduate Research Assistant | University of Wisconsin-Madison, Madison, WI
Advisor: Yea-Seul Kim

- Conducted accessibility research on how blind and low-vision people access data visualizations and web-based information.
- Contributed to studies of visualization alternative text, accessible data tables, and nonvisual mappings of charts using qualitative and user-centered research methods.

Jul 2021 – Sep 2021

Research Experiences for Undergraduates Intern | University of Wisconsin-Madison, Madison, WI
Advisor: Yea-Seul Kim
